

About the LEONARDO DA VINCI Program

The LEONARDO DA VINCI program is an initiative of the European Union with the aim of promoting students' and graduates' professional development through facilitating internships in countries within Europe. The Program coordinates placements for internship, contributes financially towards transport, and offers a basic stipend. The program has placed more than 100,000 participants since 1995.

The LEONARDO DA VINCI program provides STUDENTS with a valuable opportunity to exercise their technical knowledge and abilities in a practical work environment specific to their training. Moreover, the internship abroad is an opportunity to improve language skills as well as general and intercultural qualifications – such as intercultural communication and cooperation, teamwork abilities, tolerance, open-mindedness, adaptability and awareness of other cultures and institutional structures.

At the moment we have special placement offers from local companies, which are looking for students from your country. **We are able to support those placements with a remuneration of approx. 350€ per month plus the financial support of the company.**
